

HiAsm Studio 5!

CNET PACKET

The .NET Framework is an integral Windows component that supports building and running the next generation of applications. C# (pronounced “C sharp”) is a programming language that is designed for building a variety of applications that run on the .NET Framework. C# is simple, powerful, type-safe, and object-oriented. The many innovations in C# enable rapid application development while retaining the expressiveness and elegance of C-style languages.

HiAsm Studio offers a packet of application development based on the C # language. Using HiAsm Studio, you can build Windows Forms and Console application or Dynamic Library. Knowledge of the language itself is not required. Intuitive interface, visualization of the algorithm and the context help is the basis of rapid application development. Examples of use of each circuit element attached description it. The community users of HiAsm Studio ready to help to you. Join us! You are welcome!
